SESSION DESCRIPTION:

[Artificial Intelligence (AI), Information and Communication Technology (ICT), and Computing are no longer limited to their respective fields in today's quickly changing digital landscape. The laws governing these technological developments are being significantly impacted by them. To better understand how AI and ICT interact with legal concerns including privacy, security, data protection, intellectual property, and ethical considerations, this session will

examine the growing synergy between technology and law. As the deployment of AI and computing systems continues to expand across sectors like healthcare, finance, defense, and entertainment, the need for robust legal frameworks to regulate and guide their use has never been more critical. This session will delve into the role of law in ensuring that technological progress is aligned with social, ethical, and human rights considerations. The session will also highlight key case studies, regulatory frameworks, and the future of techno-legal partnerships in shaping the next generation of AI and computing systems.]
