SESSION DESCRIPTION:

The purpose of this Special Session is to examine Emerging Trends, Challenges, and Applications in Data Intelligence and Biomedical Sciences. We hope to bring researchers and academics together to discuss their most recent research on intelligent computing methods, intelligent communication systems, machine learning for data science, web mining, wireless networks, big data communication & IOT, cloud communications, networking and Biomedical Sciences etc. We encourage the submission of high-quality original research and articles that are closely related to the following topics from

interdisciplinary submissions that bring together researchers working on the next generation of the Internet of Things, Artificial Intelligence, Smart Information Processing, IoT Security, Machine Learning, Deep Learning, Cloud Computing, Optimization Algorithms, Networking Biomedical Science.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

- Data and Business Intelligence
- Internet of Things
- Artificial Intelligence
- Smart Information Processing
- IoT Security
- Machine Learning
- Deep Learning
- Cloud Computing
- Optimization Algorithms
- Networking
- Recommender Systems
- Block Chain
- High Performance Computing
- Biomedical Science
- Chemical Engineering

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this special theme session on **[session name] on or before [30th November 2024]**. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at https://icicc-conf.com/paper_submission.
